### Search Notes

Examiner Fronda,

Here are the results of the search you requested.

Please feel free to contact me if you have any questions.

Please perform sequence search and interference search for Serial No. 09/975,813

1. Please search SEQ ID No.: 1 against amino acid commercial and interference databases including pending and issued.
2. Please search SEQ ID No.: 2 against amino acid commercial and interference databases including pending and issued.
3. Please search SEQ ID No.: 3 against amino acid commercial and interference databases including pending and issued.
4. Please search SEQ ID No.: 4 against amino acid commercial and interference databases including pending and issued.

Please save on COMPUTER DISKETTES.

Please save results from interference data base search on different diskettes from the commercial and issued search results.

Thank you very much.

## Protein Sequence Searches - February 2005

All of the sequence databases on ABSS have recently been updated.

- Please note that the curators of the UniProt database have purged some temporary accession numbers from the most recent version of UniProt. These sequences have been assigned new permanent accession numbers. The new UniProt record may not contain the previous temporary accession number.
- If you encounter an accession number from an older search run against UniProt (results file extension **.rup**) that can no longer be found in the database, the permanent record with the new accession number can be found by searching the old accession number in the UniProt Protein Archive database (UniPARC) at:

<http://www.pir.uniprot.org/database/archive.shtml>

If you have any questions regarding this information or your results, please contact any STIC searcher.

**When submitting sequence search results for scanning into IFW, please include a copy of this attachment to assist any future Examiners or members of the public who may encounter UniProt temporary accession numbers.**
